

# Window Replacement Cost Guide

## Canada 2026

---

This guide provides honest 2026 price ranges for window replacement across Canada, including installed costs by window type, key factors that affect price, and guidance on choosing a qualified installer.

### Installed Cost by Window Type (2026)

Window Type	Supply Only	Installed	Notes
Double-hung vinyl	\$250-\$550	\$450-\$900	Most common style
Casement vinyl	\$300-\$650	\$550-\$1,100	Better seal than double-hung
Bay / Bow	\$900-\$2,500	\$1,800-\$4,500	Structural work often required
Sliding window	\$280-\$600	\$500-\$950	Common in condos
Fixed / Picture	\$200-\$450	\$350-\$700	No moving parts

### 5 Factors That Affect Window Replacement Price

#### 1. Frame material

Vinyl is the most affordable. Fiberglass runs 20-40% more but lasts longer. Wood is premium and requires more maintenance.

#### 2. Glass package

Double pane is standard. Triple pane adds \$80-\$200 per window but improves performance in colder climates (Winnipeg, Calgary).

#### 3. Window size and style

Bay and bow windows require structural work. Custom shapes cost more. Standard sizes are always cheaper.

#### 4. Installation complexity

Second-floor windows, masonry openings, or rotted framing adds labour cost. Expect \$100-\$400 extra per problem window.

#### 5. Your city

Toronto and Calgary labour rates run 15-25% higher than mid-size cities. Get 3 quotes from local installers.
